Tanzania

at Glance

EXPLORE UNFORGETTABLE EXPERIENCES

FASCINATING CULTURE

As the world becomes more modernized, the opportunity to go “back in time” in order to visit remote tribes is becoming rarer by the day. Experience the hospitality of a local meal and the rhythms of traditional dance. Chat and barter at local markets.

AMAZING WILDLIFE

More than almost any other destination, Tanzania is the land of safaris. Wildebeest stampede across the plains. Elephants wander along seasonal migration routes and chimpanzees swing through the treetops. Throughout the country there are unparalleled opportunities to experience this wealth: and hold your breath while lions pad around your vehicle in Ngorongoro Crater

A close-up, sepia-toned photograph of an elephant's head and trunk, filling the top half of the page. The trunk is thick and wrinkled, curving downwards. The elephant's eye is partially visible, and its skin has a textured, wrinkled appearance.

The most beautiful Destination in **Africa**

Here in Tanzania we want to invite you into the space and freedom of Africa's wild places; travel in open vehicles; get you out on foot; take you to shaded and peaceful campsites; and show you the joy of quality time with wildlife. We want to bring back a sense of excitement and wonder at being in the wilds. Let us take you on adventures, and together build lasting friendships. This is what safari'ing is all about. Welcome to our pristine National Parks!

WONDERFUL LANDSCAPES

Tanzania has varied terrain and fine collection of peaks rolling ridges, Hills and mountain Ranges. Landscapes range from the forested slopes of the Udzungwa Mountains to the sheer cliffs of the volcanic Meru's Crater and the final Scree slopes ascent of the Mount Kilimanjaro. Treks and Hikes range from Village to Village.

AMAZING BEACHES

Travel back in time to the days when the East African coast was the seat of sultans and a linchpin in a far-flung trading network extending to Persia, India and beyond. Tanzania's Indian Ocean coastline is magical, with tranquil islands and sleepy coastal villages steeped in centuries of Swahili culture.

SERENGETI NATIONAL PARK

ATTRACTION AT GLANCE

As also known as the wonder of the Natural world Serengeti is the keystone attraction and the largest park in Tanzania with an area of 14763 square kilometers. which is considered one of the 7 natural wonders of the world and is truly a sight to behold.

The park is also home to the endangered blackrhinoceros and African wild dogs and lots of other animals.

All the classic big game animals of Africa are found in the Serengeti. Of recent importance are re-introduction programs for black rhino and Cape hunting dogs.

The black rhino is being introduced in the north and south of the Park while hunting dogs are beginning to spread throughout.

ATTRACTIONS

Whether you stay for two days or a week, it never seems to be long enough to take in all the Serengeti has to offer.

The annual migration of animals within Tanzania's Serengeti and Kenya's Maasai Mara ecosystem involves an estimate 1.7 million wildebeest as well as 0.3 zebra, 0.4 Thompson gazelles.

The Serengeti is on almost everyone's wish list for a safari to Tanzania, but one can only absorb the full extent of Tanzania's extraordinary depth and character as a safari destination by including other places in one's travels.

ACTIVITIES

- Game viewing by vehicle
- Walking safaris
- Ballooning is now possible in the north, south and center of the Park

WHEN TO GO

Perhaps uniquely among East African parks the Serengeti has no low season. It is rewarding at any time of year.

NGORONGORO

CONSERVATION AREA

ATTRACTION AT GLANCE

Ngorongoro Crater is hard to beat for its beautiful scenery, its animal densities and its wildlife watching opportunities. The crater actually a caldera, or collapsed volcano has been declared a Unesco World Heritage site, and the open grasslands on the crater highlights include the black rhinoceros and a large number of lions.

Only giraffes and impalas seem not to find the crater to their liking.

The surrounding Ngorongoro highlands offer many hiking routes to combine with your crater safari.

Add wetlands, forest and grasslands, some out-of-this-world clifftop accommodation and the result is the Ngorongoro Crater, a safari destination that offers excellent game viewing in the most unique of settings.

THE UNIQUENESS

In addition to the beautiful scenery, archaeological wealth and abundant wildlife, Ngorongoro Conservation Area is also blessed with a proud people – the Maasai – a pastoral tribe that has maintained their traditional culture a great deal. Before the Maasai, there were other tribes that also occupied Ngorongoro, some as cattle herders, like the Datoga, and others as hunters, like the Hadzabe; and then moved on, sometimes forced out by other groups.

The Maasai colonized the area in substantial numbers, their traditional way of life allowing them to live in harmony with the wildlife and the environment. Approximately 100,000 Maasai live in the conservation area today tending their livestock without harming wildlife.

Visitors to the Ngorongoro Conservation Area can learn about the culture of the Maasai and take photographs or buy original Maasai handicraft at designated areas known as cultural bomas. In order to safeguard the livelihood of these people and at the same time conserve the flora and fauna of the area

ACTIVITIES

- Full day Game driving
- Crater Rim walk
- Empakai Crater Hiking
- Maasai Village Cultural Visit.
- Olduvai Gorge Visit
- The Moving Sand Visit

WHEN TO GO

Perhaps uniquely among East African parks the Ngorongoro has no low season. It is rewarding at any time of year.

Ngorongoro crater is a year round destination with access to all parts throughout the year

RUAHA

NATIONAL PARK

ATTRACTION AT GLANCE

Ruaha National Park is vast, and was upgraded to a National Park in 1964 and was further enlarged in 2008 to its current size of 20,226 sq. km making it Tanzania's second largest National Park. Rivers, mountains, plains, rock kopjes, swamps, dense woodlands, open savannas spread out across an immense landscape that has barely been touched by man.

Wooded hillsides, many with rounded granite outcrops and scatterings of huge baobabs, are dissected by sandy, rock strewn seasonal rivers and streams running down to meet flood plains and seasonal swamps, many of which end up in the Great Ruaha River.

Wildlife is especially varied because of the overlap of eastern and southern. African wildlife zones, so besides regular big game such as elephant, buffalo, and plains animals, the more unusual species such as the antelopes kudu, roan, greater and lesser kudu are quite common.

Cape hunting dog are also often encountered. Ruaha is also a great place for the big cats lion, leopard and cheetah.

Driving to Ruaha is about 130km from Iringa town and 625 km from Dar-es-salaam city. The road into the park is passable throughout the year.

THE ROUTE

While visiting Ruaha National Park you may pass through the Isimila Stone Age and Mtwā Mkwāwa Museum.

The Isimila Stone Age lies about 20 km to the south-west, contains archeological artifacts, particularly stone tools, from human habitation about 70,000 years ago. Mtwā Mkwāwa Museum located at Kalenga ward was established in 1954 after returned of Mkwāwa skull belonged to Hehe ethnics group from Germany after restored for 56 years.

LANDSCAPE

The only perennial river is the Great Ruaha River, which flows along the southeast boundary, but even this becomes only a trickle in places at the end of the dry season in October.

Seasonal rivers are lined by scattered groves of palms, thorn trees, and sausage trees providing midday shade for all sorts of wild animals. They are key features to enjoy during game drives, especially during the dry season when only pools remain or the elephants have to dig in the sand for water. This is Africa of a bygone era – the world as it was before modern man.

ACTIVITIES

- Game viewing by vehicle.
- Walking safaris accompanied by an armed guide approved by the Park authorities
- Night game driving in approved locations.

MOUNT KILIMANJARO

NATIONAL PARK

ATTRACTION AT GLANCE

ECOSYSTEM

In fact Kilimanjaro is a large stratovolcano (i.e. it is built up of many layers of strata consisting of lava, volcanic ash, pumice and tephra). The mountain consists of three peaks or volcanic vents.

Shira is the oldest but only stands at 3,962 meters (13,000 feet). Mawenzi is the second oldest and stands at 5,159 meters (16,893 feet). Both Shira and Mawenzi are extinct volcanoes.

The mountain's ecosystems are as strikingly beautiful as they are varied and diverse. Once inside the park, thick lowland forest covers the lower altitudes and breaks into alpine meadows once the air begins to thin. Near the peak, the landscape is harsh and barren, with rocks and ice the predominant features above a breathtaking African view.

OVERVIEW

As the highest point on the African continent at 5895 metres and it is located in the North-East of Tanzania – near the border of Kenya. The mountain proper covers an area of 100 kilometres long and 65 kilometres wide.

Mount Kilimanjaro is the highest mountain in Africa and the tallest free-standing mountain in the world (note: free-standing means it is not part of a mountain range)

THE ROUTES TO THE TOP

There are six established routes to climb Mount Kilimanjaro – Marangu, Machame, Lemosho, Shira, Rongai and Umbwe. The Marangu, Machame, and Umbwe routes all approach from the south of the mountain.

The Lemosho and Shira routes approach from the west. The Rongai route approaches from the north near Kenya. All routes except Marangu and Rongai descend via Mweka.

MARANGU ROUTE

As known as the 'coca-cola route',

This is the oldest and one of the most popular routes. Many agree that this is the easiest path to the summit point. Although it is the easiest route, it is not as scenic as other routes. However, it does offer huts for accommodation whereas the other routes only have tented accommodation. Minimum days required is 5 days.

MACHAME ROUTE

This is the 'whiskey route'. This is undoubtedly the most popular route. Although more taxing physically, it offers beautiful scenery! The minimum days required for this route is 6 days.

LEMOSHO ROUTE

A relatively new route up the mountain, there is less traffic on this adventure. This may be the most beautiful route to take, with breathtaking views on all sides of the mountain. The minimum days required for this route is 6 days.

UMBWE ROUTE

This is almost identical to the Lemosho route. However, the start of your journey varies slightly, bypassing the walkthrough the rain-forest with vehicle transport instead. The minimum days required for this route is 6 days.

RONGAI ROUTE

Less crowded because of its remote location the route offers trekkers a unique wilderness experience where it is possible to see large wildlife like antelope, elephant and buffalo.

The Rongai route is one of the easier routes up Kilimanjaro. Rongai is the only route to approach Kilimanjaro from the north and the descent is via the Marangu Route. Summit night from Kibo Hut is steep and follows the same path taken by the Marangu route which passes.

NORTHERN CIRCUIT ROUTE

The newest addition to the Kilimanjaro family, this route offers the highest level of successful summits. An incredibly beautiful journey, the minimum days required for this route is 8 days. The route approaches Mount Kilimanjaro from the west, beginning with a long drive from Moshi to Londorossi Gate. From there, the first two days are spent trekking through the rainforest to Shira Ridge, before crossing the Shira Plateau. The route then heads north and circles clockwise from Moi Hut to Buffalo Camp to School Hut, before summiting from the east.

BEST TIME TO CLIMB MT. KILIMANJARO

One of the best times for a Tanzanian trek vacation on Mount Kilimanjaro is in the warm months of January and February when clear skies afford excellent views of superb scenery, especially from the upper slopes; though, expect some snowfall during this period. Choosing your time to climb is a very personal balancing act.

You need to weigh your objectives against your personal fitness and climbing or trekking experience.

You are more likely to gain the summit in warm, dry weather, since cold, rain, ice, snow and mud demand a lot from your body. They make tracks and paths slippery and deplete your energy levels.

From mid-March to end of May, the long rainy season increases climbing hazards. Visibility is poor, but you have the slopes to yourselves.

Lightning is every present and chancy. It is colder from June to August but the driest period on the mountains which are also highly favorable trekking months, and perfect again in September, which is warm and dry too, and, not surprisingly, another very popular and busiest time as it meets up with the prime wildebeest migration season in Northern Serengeti.

The school holiday season from June to August welcomes many families from North America and Europe for their epic Kili bonding hike with their teenage kids.

A very good number of our Guest Combine both Kili and Wildlife Safari in Tanzania and then concluding it on the beach islands of the Indian Ocean (Zanzibar) for R&R – rest and relaxation.

End of October and November is the start of the short rainy season when clear skies are the norm at dawn and dusk. By end of December, the short rains dust off with sporadic showers through January onwards with clear mountainous vistas perfect for photography but humid and advantageously less cold than from June to August.

One thoughtful way to avoid the crowds is to stagger your starting dates starting before the weekend starts, so that you are at different stages of the trek rather than going with the crowd on a weekend arrival.

Choosing an appropriate customized private trek route is a key strategy – hush-hush! Marangu being one of the busiest, quickest and the least cost option for the masses albeit with the lowest success summit rate.

Fastest and cheapest does not result to victory at most times so avoid Marangu if your mind, heart and pockets are in sync. Also, think carefully about the phase of the moon. Around full moon, night climbing is safer with better visibility and stunning photo opportunities, stark shadows delineating shining snowfields against gaunt rock faces and adding dramatic impact to the views.

WHY CLIMBING MT. KILIMANJARO

- A Mountain of Superlatives
- Just about anyone can reach the top
- One of the World's Greatest Natural Wonders
- Your visit supports the local economy
- Spectacular photo opportunities
- Personal accomplishment
- Raise money for a worthy cause
- A place for transformation
- Kilimanjaro is a Symbol of Freedom

CLIMB MT. KILIMANJARO WITH TOTO AFRICA ADVENTURES

Climbing Mt Kilimanjaro is an epic experience and the thrill of hiking up Africa's highest peak is enough reason for it to be on your bucket list. Toto Africa Adventures will work with you to make this a reality. Get in touch with us today to get started.

LAKE MANYARA

NATIONAL PARK

ATTRACTION AT GLANCE

Lake Manyara National Park lies in a very dramatic setting up against the steep western wall of the Rift Valley. Being directly en route to Ngorongoro from Arusha or Tarangire, it is a popular place either for a day visit or for longer.

However, it is an exceptional National Park that would deserve a visit regardless of where it was located; in fact so exceptional that it was declared part of a World Biosphere Reserve in 1981.

In the south of the Park are found extensive hot water springs as testament to the active tectonic nature of the Rift Valley, and there is a long walkway out across the steaming rivulets and reed beds of the lake edge giving a magnificent view up and down the full length of this part of the Rift Valley.

Here you can watch old bull buffaloes wallowing in the warm alkaline mud, and on occasions vast flocks of flamingos in.

Enormous Baobabs are scattered throughout the drier parts. In fact one of these baobabs was visited by Disney Imagineers in 1994 and became the inspiration for the baobabs that feature in Disney World's famous Animal Kingdom theme park in Orlando, Florida.

ACTIVITIES

- Game viewing by vehicle.
- Canoeing. Depending on the level of water in the lake, canoeing is an activity option..
- Night game viewing. Night game drives are possible in the Park..
- Hiking. Guided walking safaris are possible by prior arrangement with the Park authorities, including a hike up to the Marangi forest via the Iyambi River in the south..

WILDLIFE

Most of the characteristic East African mammals are found in Manyara including elephant, buffalo, hippo, lion, leopard, cheetah, giraffe and lots of plains game, and reputedly the largest baboon troupes in Africa.

Some lions have opted to rest up during the heat of midday in trees, giving rise to the mistaken belief that the Manyara lions are somehow different. Lions in many parts of Africa often spend time on the lower broad limbed branches of trees probably to escape Bies.

When to Visit. All year, although the most popular times are during the two dry seasons June – October and January and February.

TARANGIRE

NATIONAL PARK

ATTRACTION AT GLANCE

The National Park is 2,850 square kilometers in area and was gazetted in 1970. It is only a small part of a much larger ecosystem of some 30,000 sq. km that comprises most of what is called the Maasai Steppe or southern Maasailand.

Tarangire is one of the best places in Tanzania to watch elephant and spending unhurried time in the presence of these intelligent giants, often from a vantage point at a waterhole or spring is one of the greatest pleasures of a wildlife safari- A favorite routine is to leave camp early with a picnic lunch and to select a spot overlooking the Tarangire River or a hinterland waterhole and watch wildlife come and go.

WILDLIFE

It has been estimated that at the height of the dry season in October the density of large animals -elephant, buffalo, zebra, wildebeest, ostrich, giraffe, eland etc. is second only to Ngorongoro Crater worldwide. This spectacle gathers around the scattered pools of permanent water along the Tarangire river bed, and also around Silale Swamp. Lion and leopard are frequently seen here as well.

ACTIVITIES

- Game viewing by vehicle.
 - Walking safaris with an armed guide.
 - Night game viewing.
- Night game drives are possible in the Park.

WHEN TO GO

This is a year-round park with the distinct seasons offering different experiences, from dry and dusty with animals clustered around shrinking water holes and the trickle of Tarangire River, to the green season full of newborn animals and chattering birds.

ARUSHA

NATIONAL PARK

ATTRACTION AT GLANCE

This beautiful Park has often been called a little gem and rightly so. It is only ½ an hour by tarmac road from Arusha town, the safari center of northern Tanzania. With mountains, valleys, lakes, and small plains clothed in green, it has a wonderful feeling of peace and solitude. It is dominated by Mount Meru, which at 4,566 A well maintained and signposted network of game viewing roads and tracks wind through the Park offering frequent views of spectacular beauty, with both Mount Meru and Kilimanjaro.

It is habitat for a wide variety of mammals including bushbuck, giraffe, elephant, leopard (rarely seen!), monkeys, duiker, baboon, buffalo, waterbuck and hippo. The birdlife is spectacular with over 450 species recorded. The game viewing track that winds around the Momella Lakes is a great way to get close to and watch lesser and greater flamingo.

ACTIVITIES

- Game viewing by vehicle.
- Canoeing. Depending on the level of water in the lake, canoeing is an activity option..
- Night game viewing. Night game drives are possible in the Park..

MOUNT MERU

Mt. Meru is a dormant volcano about 1 ½ million years old. One side of exploded out about 8,000 years ago as Meru's caldera lake was transformed into super-heated steam by an inner eruption. One of the largest landslides of mud and rock ever measured world-wide took place, forming hillocks, valleys and small lakes. The geologists estimate that before Mount Meru blew its top it was a tall, symmetrical volcanic spire almost as high as Mount Kilimanjaro.

NGURDOTO CRATER

At the bottom end of the Park is another small, but complete, volcanic crater called Ngurdoto, which has recently been opened to guided hikes. It is a secret paradise, with a lake on one side and elsewhere clothed in virgin forest and a network of open grassy glades.

A track follows the rim with look-out points established where one can relax with a picnic and look down into this secret world of swamps and plains and spot buffalo, warthog and occasional elephant enjoying its tranquility.

ZANZIBAR

ISLAND

ATTRACTION AT GLANCE

Zanzibar The name alone evokes images of tropical paradise. Calling up visions of picturesque islands with soft-sand, white beaches and shimmering azure waters. Yet, the Zanzibar Archipelago has so much more to offer than romantic coastlines and blissful sunsets. These islands offer a kaleidoscope of sights, smells, tastes and experiences that will feed your soul, rejuvenate your body and reawaken your creativity. Zanzibar is without a doubt a dream beach destination. An ideal place to get away from it all.

Zanzibar is the home of idyllic beaches, balmy weather & warm tropical waters. This archipelago is renowned for clear warm waters, coral reefs and rich marine diversity making it a perfect under-water destination for snorkelling and diving.

JOZANI FOREST

Hidden away in the heart of Zanzibar, covering 50 square kilometers of incredible natural beauty is the Jozani Forest Reserve, a must visit on your tour of this Indian Ocean Island. This reserve was designated as a protected area in the 1960s.

Thanks to its establishment, the rare and endangered kirk's red colobus monkeys have received a new lease of life and are slowly recovering from the brink of extinction. There are now an estimated 2500 of this beautiful mammalian life in the reserve.

THE SIGHTS

Zanzibar has some of the world's most beautiful diving sights and warm waters. No wonder it is a popular destination for those wanting to explore the underwater world. You can do both shore dives and reef dives accessed by boat.

THE UNIQUENESS

The island's east coast is fringed by kilometer after kilometer of beach with white sands and turquoise waters. At Amandus Adventures, we are happy to advise you which beach would be the best fit for your holiday plans. Zanzibar can be enjoyably visited year-round, although the months of March through May can be very wet.

WALKING

Safaris

A walking safari is normally designed to fit into your safari schedule, and can be scheduled early in the morning or late afternoon when tropical temperatures are cool. Until recently walking safaris were offered mainly in the Selous Game Reserve and Wildlife Management Areas and restricted to a few National Parks like Gombe Stream, Mahale Mountains, Rubondo Island, Udzungwa Mountains, Kitulo, Mt Kilimanjaro and Arusha (Mt Meru) which may be extended into trekking. Today visitors can enjoy safaris on foot in Tarangire National Park, the Ngorongoro Conservation Area including Ndutu.

On foot you can walk into remote areas and reach places that a safari car can't. Once on foot, you are not constrained by roads and can go almost anywhere you like. Away from the crowds, off the beaten track. It offers you a freedom incomparable to any game drive safari.

Toto Africa Adventure is a pioneer in setting up walking safaris, particularly in Serengeti National Park. Only a handful of companies have been granted permission to enter this park on foot. The regulations stipulate that an armed and qualified walking guide from the operating company must accompany all walks. An armed ranger from the National Park will also join every walk.

BALLOON

Safaris

OVERVIEW

Balloon Safaris in Tanzania are popular in Serengeti. You can stretch our eyes as far as you can see while up the sky. Flights take-off from here because the climate is almost perfect and the winds blow gently and reliably throughout the year. Each balloon flight is a different journey dictated by the direction of the wind, where the sights and sounds rise from the ground to meet you. It is one of the romantic and evocative ways of experiencing the wilderness of East Africa as you gracefully and silently fly over the plains crowded with herds of wildlife in the early morning.

THE UNIQUENESS

There are things that are worth getting up early for, and a balloon safari is certainly one of them. Rising before the birds and heading out from your camp in Serengeti in the silence towards the launch-site is all part of the anticipation. Perhaps one of the Serengeti's more indefinable inhabitants will be caught in a hunt by the headlights on this nocturnal game drive to the take-off points.

Balloon safaris are held regularly in the Serengeti and take off from the designated sites (in the serengeti area) where the disturbance to animals is kept to a minimum. Your safari vehicle drops you off at the take-off site and picks you up from your landing site. Often a balloon trip is followed by a champagne breakfast in the bush, raising a glass to your time in the skies.

Normally, a balloon safari begins in the morning, around 6 am and lasts for roughly 1-2 hours floating silently in the sky in a hot-air balloon seeing the bush from above. You are exposed to see the sun rise from a distance and very likely to see the magnificent number of wildlife below, over several square kilometers of the park tramping the savannah. The clarity of the air affords you the views of the Ngorongoro Highlands and sometimes Lake Victoria. From our lofty vantage point, you can appreciate the Serengeti in all its majestic scale, and you have a view freed by the narrow confines of vehicles and roads.

DAY TRIPS & CULTURAL

Safaris

ATTRactions AT GLANCE

Cultural tourism has become a fundamental part of the tourism industry in Tanzania spearheading an increase in tourist arrivals into the country, thus empowering rural communities to reap the fruits of globalization and the ever growing tourism industry.

Tanzania's peoples they are among the most welcoming and approachable on earth, with the range of fascinating cultures ready to be shared with visitors.
